#### Waiting Period Calm.

FREDERIC H. HATCH & CO. Were it not for this long drawn out eriod of patience securities might well have been expected to show something more than the nervousness that marked last week's dealings while we Wm.A.Read&Co. were waiting for news of Germany's position. As it was, prices in this time of suspense gave way slowly, and the size of the markets diminished instead of being enlarged under pressure of apprehensive selling. Speculative accounts for the rise had been lightened in the Nassau & Cedar Streets, New York for the rise had been lightened in the break that came two weeks before, when the President laid our case against Germany before Congress and sent his message to the other side.

Last week's, early decline was hardly more than could be accounted for by natural reaction from the over-rapid recovery of the week preceding.

While caution prevented new buying orders from the general public, there was little liquidation until Friday and marked absence of outside interest in

## Bond Buying Slack.

Buying of bonds practically ceased as investors decided to delay until some light was thrown on the future course of our international affairs.
There are still a large amount of bonds waiting to be placed with final holders and some private offerings were made at concessions, but only slightly below the market. Time loans could be had readily at rates practically unchanged from those of the days preceding. Per-haps banking circles took the interna-tional crisis with greater calmness than was shown in the stock market. At a meeting of the Board of Directors of the American Thermos Bottle Company, held in this city on May 2rd, 1916, a dividend of Three Dollars per share was declared payable June 1st, 1916, to all stockholders of record May 20th.
